

# HIEU A. DOAN

Chicago, IL | (832)-434-4703 | hieu.a.doan@gmail.com | hieuadoan.github.io

## SUMMARY

---

A computational scientist with over 10 years of experience in leveraging molecular simulation, high-performance computing, and machine learning for scientific research. Specialized in the virtual screenings and design of experiments for catalysts and energy storage materials, contributing to significant advancements in closed-loop discovery of optimal battery electrolytes. Recognized with two 'Best Paper' awards from the Joint Center for Energy Storage Research, a Department of Energy's Energy Innovation Hub for designing and building next-generation battery materials.

## PROFESSIONAL EXPERIENCE

---

### Computational Materials Scientist

Argonne National Laboratory | Lemont, IL

May 2022 – Apr 2024

- Developed and apply machine learning models to learn on computational (DFT) and experimental characterization data (CV, NMR)
- Combined high-throughput atomistic modeling with graph neural networks for in silico design of optimal catalytic materials for biomass utilization
- Leveraged automated materials preparation and characterization platforms to design and execute closed-loop active learning workflows for accelerated electrolyte discovery

### Postdoctoral Appointee

Argonne National Laboratory | Lemont, IL

Nov 2018 – Apr 2022

- Developed a multi-objective Bayesian optimization algorithm to identify redox flow battery electrolytes with multiple desired criteria
- Collaborated with chemists and roboticists to design an automated experiment for measuring battery performance
- Performed high-throughput first-principles calculations to create a database of 20,000 catalyst structures and built a graph neural network model for accelerated property prediction.

### Postdoctoral Fellow

Northwestern University | Evanston, IL

Jul 2016 – Oct 2018

- Evaluated the potential of supported pure and mixed copper oxide nanoclusters for the direct conversion of methane to methanol via density functional theory simulation
- Carried out high-throughput computational screening of metal-organic framework catalysts for methane activation

## TECHNICAL SKILLS

---

<b>Materials Simulation</b>	Density functional theory (DFT using VASP/Gaussian 16), COMSOL
<b>Machine Learning</b>	Bayesian optimization, graph neural network, generative AI
<b>Programming Language</b>	Python, SQL, HTML, CSS, shell scripting
<b>Software Package</b>	PyTorch, Scikit-learn, RDKit, Pandas, NumPy, SciPy, Streamlit
<b>Cloud Computing</b>	HPC, AWS

## EDUCATION

---

### Ph.D. in Chemical Engineering

University of Houston | Houston, TX

Dec 2015

Dissertation : Computational Screening of Bifunctional Catalysts for CO and CH<sub>4</sub> Oxidation

- Performed density functional theory calculations and microkinetic modeling to investigate the multifunctionality of bimetallic transition metal catalysts, unravel the mechanism behind CO oxidation over gold/titania, and guide the design of palladium catalysts for methane slip reduction in natural gas vehicles.
- Mentored new team members, oversaw undergraduate research projects, and contributed to tutoring and grading for courses such as “Chemical Engineering Thermodynamics” and “Design, Safety & Reliability.”

### B.S. in Chemical Engineering – Magna Cum Laude

University of Houston | Houston, TX

Dec 2009

Honor Thesis : Experimental Analysis of Soot Combustion in Diesel Particulate Filter

## HONORS

---

2023	Poster Session Award from the 5 <sup>th</sup> Battery and Energy Storage Conference   AIChE
2022	Best Paper Award from the Joint Center for Energy Storage Research
2020	Best Paper Award from the Joint Center for Energy Storage Research
2019	Best Poster Presentation at the Argonne Postdoctoral Symposium
2018	Best Fundamental Paper Award from the American Institute of Chemical Engineers
2015	Kokes Travel Award for the 24 <sup>th</sup> North American Catalysis Society Meeting
2014	Best Fundamental Paper award from the American Institute of Chemical Engineers

## SELECT PRESENTATIONS

---

### Ketonization of Hexanoic Acids over ZrO<sub>2</sub> Catalysts: Insights from First-principles Calculations and DRIFTS Experiments

American Chemical Society Meeting | New Orleans, LA

Mar 2024

**Accelerating the Evaluation of Crucial Descriptors in Computational Catalyst Screening via Graph Neural Network**

American Chemical Society Meeting | Indianapolis, IN

Mar 2023

**Accelerated Discovery of Energy Storage Materials via Multi-objective Bayesian Optimization**

American Institute of Chemical Engineers Midwest Regional Conference | Virtual

Mar 2022

**Active Learning via Bayesian Optimization for the Discovery of Energy Storage Materials**

nanoHUB Tutorial Series on Machine Learning (Invited) | Virtual

Jun 2021

**Warp Jumping in the Molecular Universe with Active Learning**

Argonne AI and HPC Seminar (Invited) | Lemont, IL

Dec 2020

**Toward the Optimal Design of Molybdenum Carbide Catalysts for Biomass Conversion**

American Chemical Society Meeting (Invited) | San Diego, CA

Aug 2019

**PUBLICATIONS**
